

HARIKARAN CHETTIYAR

FULL-STACK SOFTWARE ENGINEER

Pune, India | harikaran.chettiyar@gmail.com | hari-pi.com | github.com/Hari-Pi

PROFESSIONAL SUMMARY

Full-stack software engineer who turns product requirements into reliable, deployed software. Delivered two live client platforms and works across web products, mobile applications, automation, and Linux systems, with end-to-end ownership spanning interfaces, backends, domains, deployment, performance, and handover.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, Dart, SQL, Bash
Web & Mobile	Django, React, Next.js, Node.js, Express, Flutter, REST APIs, WebRTC
Data & Auth	MongoDB, PostgreSQL, SQLite, Next-Auth, email-based authentication
Delivery & Systems	Git, GitHub Actions, CI/CD, Docker, Vercel, Cloudflare Pages, Linux, Tailscale

CLIENT DELIVERY

Full-stack Developer | Avera Data Academy

Jan - Jun 2026

Django 5 | Python | Course delivery | Student accounts | Quizzes

- Designed, built, and deployed a production learning platform spanning five academy tracks, public course discovery, and an authenticated student area.
- Implemented email authentication, enrolment-gated lessons, quiz attempts and score review, and CSV question-bank imports.
- Created an admin-managed courses-to-modules-to-lessons content model so staff can update curricula without code changes.

Web Developer | CloudStudio108

Marketing site | Booking flow | Media performance | Cloudflare Pages

- Built and deployed a production marketing and booking site that presents the studio, services, pricing, and structured enquiry flow.
- Prepared and delivered 50+ WebP media assets with lazy loading and reserved dimensions for a fast, stable image-heavy experience.

SELECTED PROJECTS

SyncPlayer - Peer-to-peer Media Synchronization

React | TypeScript | WebRTC | WASM | HLS.js

- Implemented WebRTC pairing, DataChannel playback messages, latency checks, and reusable synchronization contracts.
- Structured media and connection lifecycles into maintainable TypeScript modules and React hooks.

Sys-Config - Cross-distribution Linux Setup

Bash | JSON | jq | apt | dnf | pacman

- Built a configuration-driven setup utility that validates JSON profiles and detects native package managers across major Linux distribution families.
- Implemented dependency bootstrapping, privilege handling, and both interactive and unattended setup workflows.

Linux on a Smartphone: Realme 6

Linux kernel | Droidian | Docker | CasaOS | Tailscale

- Modified a Realme 6 device kernel for a Droidian-based Linux experiment and debugged boot, partition, and deployment issues.
- Ran containerized services and configured secure remote access for low-cost self-hosted infrastructure.

EDUCATION

B.Tech in Computer Science | Ajeenkya DY Patil University

2022 - 2026

Pune, Maharashtra | CGPA: 8.06
