

HARIKARAN CHETTIYAR

FULL-STACK SOFTWARE ENGINEER

Pune, India | harikaran.chettiyar@gmail.com | hari-pi.com | github.com/Hari-Pi

PROFESSIONAL SUMMARY

Full-stack software engineer who builds and deploys production web products from customer-facing interfaces through backend systems and infrastructure. Hands-on experience with Django, Python, TypeScript, React, Flutter, Linux automation, and client delivery, including domains, deployment, performance, and technical handover.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, Dart, SQL, Bash
Web & Mobile	Django, React, Next.js, Node.js, Express, Flutter, REST APIs, WebRTC
Data & Auth	MongoDB, PostgreSQL, SQLite, Next-Auth, email-based authentication
Delivery & Systems	Git, GitHub Actions, CI/CD, Docker, Vercel, Cloudflare Pages, Linux, Tailscale

CLIENT EXPERIENCE

Full-stack Developer | Avera Data Academy

Jan - Jun 2026

Django 5 | Python | Course delivery | Student accounts | Quizzes

- Designed, built, and deployed a production learning platform combining public course discovery with an authenticated student area.
- Implemented email authentication, enrolment-gated lessons, quiz attempts and score review, and CSV question-bank imports.
- Created an admin-managed courses-to-modules-to-lessons content model so staff can update curricula without code changes.

SELECTED PROJECTS

CloudStudio108 - Client Marketing and Booking Site

HTML | CSS | JavaScript | Cloudflare Pages | Performance

- Built and deployed an image-heavy production site with service packages, structured booking enquiries, and local-search metadata.
- Created a WebP media pipeline with lazy loading and reserved image dimensions to reduce page weight and layout movement.

CaseAtlas - Real-time Case Tracking Platform

Next.js | Node.js | Express | Socket.io | MongoDB

- Built a full-stack platform for persistent case updates, real-time discussion, authentication, and media handling.
- Designed a REST API backend and Socket.io event flow for responsive updates and interactions.

SyncPlayer - Peer-to-peer Media Synchronization

React | TypeScript | WebRTC | WASM | HLS.js

- Implemented WebRTC pairing, DataChannel playback messages, latency checks, and reusable synchronization contracts.
- Structured media and connection lifecycles into maintainable TypeScript modules and React hooks.

Android-to-Linux Private Cloud

Linux kernel | Droidian | Docker | CasaOS | Tailscale

- Adapted an unsupported Android device for a Linux-based private-cloud experiment and debugged boot, partition, and deployment issues.
- Ran containerized services and configured secure remote access for low-cost self-hosted infrastructure.

EDUCATION

B.Tech in Computer Science | Ajeenkya DY Patil University

2022 - 2026

Pune, Maharashtra | CGPA: 8.06
